

No-code first

Module 10 · Build Your Own Assistant · Chapter 02

What you will learn

- ☐ The anatomy shared by all no-code assistants
- ☐ Building one end-to-end (worked example: an exam-prep assistant)
- ☐ When to promote it toward agent-hood

Your exercise

TRY IT YOURSELF · ABOUT 10 MINUTES

Build your real assistant, exam prep or anything you'd genuinely use weekly (diet planner, cricket-stat explainer). Full anatomy: written instructions ≥ 10 lines, ≥ 2 knowledge files, 3 starters. Run the in-scope/out-scope/edge tests and log results in learn/assistant-v1.md. Keep it alive; Chapter 4 gives its powers hands.

My notes

KEY TAKEAWAYS

- Instructions + knowledge + starters = every no-code assistant ever.
- Write refusals into instructions; test them deliberately.
- Promote toward agency stepwise, re-testing guardrails each time.
